Forward bilis of lading and invoices promptly.

Prepare invoices carefully, stating car initial and number, date of shipment, number of bales, total weight of car, or of each particular kind or grade, and price data when available. Follow Instructions Closely.

If the billing instructions furnished by the consignee are not clear, it is generally a better plan to hold the shipment until satisfactory instructions are received than to take the chance of billing it incorrectly. When specific instructions as to routing or delivery are given they should be followed in detail, as it is frequently the case that shipments arriving over roads other than those specified must be switched at considerable cost before delivery can be made at the desired location. In many markets hay shipments arriving in certain railroad yards will not sell as advantageously as when they arrive in other yards because of unfavorable switching facilities or because of the distance of the yards from buyer's warehouses. Commission merchants and dealers in the markets are familiar with these fac- agency for sources of information and strictly tailored things are good.
